

(continued from outside back cover)

Structural investigation of LaCoO ₃ and LaCoCuO ₃ perovskite-type oxides and the effect of Cu on coke deposition in the partial oxidation of methane	
F.S. Toniolo, R.N.S.H. Magalhães, C.A.C. Perez and M. Schmal (Brazil)	156
Sulfate storage and stability on representative commercial lean NO _x trap components	
N.A. Ottinger, T.J. Toops, J.A. Pihl, J.T. Roop, J.-S. Choi and W.P. Partridge (USA)	167
Transformations of thiophene compounds under catalytic cracking conditions	
O.V. Potapenko, V.P. Doronin, T.P. Sorokina, V.P. Talsi and V.A. Likholobov (Russia)	177
Effect of Cl/Ni molar ratio on the catalytic conversion of polypropylene into Cu–Ni/C composites and their application in catalyzing “Click” reaction	
J. Gong, J. Liu, L. Ma, X. Wen, X. Chen, D. Wan, H. Yu, Z. Jiang, E. Borowiak-Palen and T. Tang (China, Poland)	185
A KrCl exciplex flow-through photoreactor for degrading 4-chlorophenol: Experimental and modelling	
M. Gomez, M.D. Murcia, J.L. Gomez, E. Gomez, M.F. Maximo and A. Garcia (Spain)	194
Methanol-tolerant Pd nanocubes for catalyzing oxygen reduction reaction in H ₂ SO ₄ electrolyte	
C.-L. Lee and H.-P. Chiou (Taiwan)	204
The SCR of NO with methane over In,H- and Co,In,H-ZSM-5 catalysts: The promotional effect of cobalt	
F. Lónyi, H.E. Solt, J. Valyon, A. Boix and L.B. Gutierrez (Hungary, Argentina)	212
On the true morphology of highly photoactive anatase TiO ₂ nanocrystals	
M. Čaplovičová, P. Billik, L. Čaplovič, V. Brezová, T. Turáni, G. Plesch and P. Fejdi (Slovakia)	224
Gas-phase hydrodechlorination of trichloroethylene over Pd/NiMgAl mixed oxide catalysts	
B.T. Meshesha, N. Barrabés, K. Föttinger, R.J. Chimentão, J. Llorca, F. Medina, G. Rupprechter and J.E. Sueiras (Spain, Austria)	236
Catalytic ozonation of toxic pollutants over magnetic cobalt-doped Fe ₃ O ₄ suspensions	
A. Lv, C. Hu, Y. Nie and J. Qu (China)	246
Hydrogenolysis of glycerol to obtain 1,2-propanediol on Ce-promoted Ni/SBA-15 catalysts	
I. Jiménez-Morales, F. Vila, R. Mariscal and A. Jiménez-López (Spain)	253
Study of potassium-supported TiO ₂ catalysts for the production of biodiesel	
D. Salinas, P. Araya and S. Guerrero (Chile)	260
Synthesis of MWNTs/g-C ₃ N ₄ composite photocatalysts with efficient visible light photocatalytic hydrogen evolution activity	
L. Ge and C. Han (People's Republic of China)	268
NO _x reduction by H ₂ on WO ₃ /ZrO ₂ -supported Pd catalysts under lean conditions	
M. Leicht, F.J.P. Schott, M. Bruns and S. Kureti (Germany)	275
Solar photocatalysis for the abatement of emerging micro-contaminants in wastewater: Synthesis, characterization and testing of various TiO ₂ samples	
H. Dimitroula, V.M. Daskalaki, Z. Frontistis, D.I. Kondarides, P. Panagiotopoulou, N.P. Xekoukoulotakis and D. Mantzavinos (Greece)	283
Tailored investigation and characterization of heterogeneous {Mn,Cu}/TiO ₂ catalysts embedded within a ceria-based framework for the wet peroxide oxidation of hazardous pollutants	
R.J.G. Lopes, M.L.N. Perdigoto and R.M. Quinta-Ferreira (Portugal)	292
Single-stage medium temperature water-gas shift reaction over Pt/ZrO ₂ – Support structural polymorphism and catalyst deactivation	
C.A. Franchini, A.M. Duarte de Farias, E.M. Albuquerque, R. dos Santos and M.A. Fraga (Brazil)	302
Iron–sulfur codoped TiO ₂ anatase nano-materials: UV and sunlight activity for toluene degradation	
K.C. Christoforidis, S.J.A. Figueroa, M. Fernández-García (Spain, France)	310
Polymer electrolyte fuel cell supplied with carbon dioxide. Can be the reductant water instead of hydrogen?	
M. Morikawa, N. Ahmed, Y. Ogura and Y. Izumi (Japan)	317
RuSn bimetallic catalysts for selective hydrogenation of levulinic acid to γ-valerolactone	
S.G. Wettstein, J.Q. Bond, D.M. Alonso, H.N. Pham, A.K. Datye and J.A. Dumesic (USA)	321
Hydrogen production from cellulose, lignin, bark and model carbohydrates in supercritical water using nickel and ruthenium catalysts	
P. Azadi, S. Khan, F. Strobel, F. Azadi and R. Farnood (Canada, Germany)	330
SO ₂ adsorption and transformation on calcined NiAl hydrotalcite-like compounds surfaces: An <i>in situ</i> FTIR and DFT study	
L. Zhao, X. Li, C. Hao and C.L. Raston (China, Australia)	339
Selective catalytic oxidation of ammonia to nitrogen over CuO/CNTs: The promoting effect of the defects of CNTs on the catalytic activity and selectivity	
S. Song and S. Jiang (PR China)	346
Surface properties and visible light activity of W-TiO ₂ photocatalysts prepared by surface impregnation and sol–gel method	
E. Grabowska, J.W. Sobczak, M. Gazda and A. Zaleska (Poland)	351
Catalysis oxidation of 1,2-dichloroethane and ethyl acetate over ceria nanocrystals with well-defined crystal planes	
Q. Dai, H. Huang, Y. Zhu, W. Deng, S. Bai, X. Wang and G. Lu (PR China)	360
Alumina-supported In ₂ O ₃ , Ga ₂ O ₃ and B ₂ O ₃ catalysts for lean NO _x reduction with dimethyl ether	
S. Erkfeldt, M. Petersson and A. Palmqvist (Sweden)	369
Ni/SiO ₂ and Ni/ZrO ₂ catalysts for the steam reforming of ethanol	
I. Rossetti, C. Biffi, C.L. Bianchi, V. Nichele, M. Signoretto, F. Menegazzo, E. Finocchio, G. Ramis and A. Di Michele (Italy)	384
Cobalt based emission control catalysts with high resistance towards halide poisoning	
M. Hammes, K. Stöwe and W.F. Maier (Germany)	397
Evaluation of ion exchange-modified Y and ZSM5 zeolites in Cr(VI) biosorption and catalytic oxidation of ethyl acetate	
B. Silva, H. Figueiredo, O.S.G.P. Soares, M.F.R. Pereira, J.L. Figueiredo, A.E. Lewandowska, M.A. Bañares, I.C. Neves and T. Tavares (Portugal, Spain)	406
Pumice-catalyzed ozonation degradation of <i>p</i> -chloronitrobenzene in aqueous solution	
L. Yuan, J. Shen, Z. Chen and Y. Liu (China)	414
